1947-1948

TWENTY-FIFTH SESSION

VOLUME FOURTEEN

DR. F. HAROLD SHEPHERD
President

PRESIDENT'S MESSAGE

As we are about to enter upon the activities of another Academy year, I wish to express my appreciation, and that of my associates on the Executive Council, for the trust you have placed in us by electing us to our respective offices. I can assure you that it is our desire, collectively and individually, to discharge the duties of our offices to the best of our ability.

In arranging the programme for the year 1947-48, the committee has endeavoured to select essayists of the highest calibre—men who are recognized leaders in their various fields. It is our earnest belief that each of the men we have chosen has much to offer, and that the members will derive great benefit from attendance at the meetings.

As formerly, the Opening Dinner and the Annual Winter Clinic will be held in the Royal York Hotel. The General Meetings, this year, will be held in the theatre of the Royal Ontario Museum, at the corner of Bloor Street and Avenue Road. This well-appointed and centrally located auditorium should prove to be a very satisfactory meeting place. In addition to these regular meetings, a course on Partial Denture Prosthesis, in the form of a clinic, by Dr. Victor L. Steffel, of Columbus, Ohio, will be held in the Royal York Hotel, on Thursday, November 6th. Complete details of the programme may be found in the following pages.

While last year's membership in the Academy reached a new high figure, it is still not as high as it should be. There are many dentists in Toronto and district who do not avail themselves of the benefits offered by the Academy. To those men I extend a special invitation to join with us. The Academy can help you—you can help the Academy.

I trust that the same generous spirit of support and co-operation which has characterized our society in the past may again prevail, so that 1947-48 may be another notable milestone in a long series of successful Academy years.

F. HAROLD SHEPHERD, President.

OFFICERS OF THE ACADEMY OF DENTISTRY

President—F. H. Shepherd, 1474 Bathurst St.	LL. 9456
President-Elect—J. H. Johnson, 230 College St.	MI. 6611—276

DENTAL PUBLIC HEALTH COMMITTEE

This committee has a representative from each of the district dental societies and functions in close liaison with the Dental Public Health Committee of the Ontario Dental Association. The whole policy of the Ontario body is based on the national health scheme drawn up by the Canadian Dental Association.

This co-ordination of effort must be extended to the individual dentist so that educational messages to the public will be properly informative and not confusing. It is desired that a general appreciation of dental health service will be established. This should lead to a widespread demand for comprehensive preventive treatment in lieu of intermittent visits to secure relief from dental emergencies.

The North Toronto Dental Association and the West Toronto Dental Society each set aside one of their meetings for Dental Public Health. In both cases the meetings were well attended with active discussion and helpful interchange of ideas. The committee hopes that each District Society will set aside one of their meetings for Dental Public Health on the program for the coming year.

Our program is an ambitious one and will require much help. We wish to thank the Ontario Committee for its assistance and leadership and to assure them of our continued co-operation.

ANNUAL DINNER MEETING

ROYAL YORK HOTEL

6.30 P.M.

OCT. 20, 1947

THE HON. T. D. BOUCHARD

Subject: "UNITY ACROSS CANADA"

Born, St. Hyacinthe, Que., December 20, 1881.

Educated: Girouard Academy; Seminary of St. Hyacinthe.

Editor of the weekly "L'Union" 1899, founder and editor-in-chief of the weekly "Le Clarion" 1912. Municipal Councillor, City of St. Hyacinthe, 1905-08; City Clerk, 1908-12; Mayor, City of St. Hyacinthe, 1917-44. First elected to the Legislative Assembly of the Province of Quebec for St. Hyacinthe, 1912 and, with the exception of the years 1919-23, has sat continuously since that time until March 4, 1944, when he was called to Senate of the Dominion of Canada. Deputy Speaker, Provincial Assembly, 1928-30; Speaker, 1930-35; first Provincial Minister of Municipal Affairs, Trade and Commerce, 1935-36; Chairman of National Syndicate of Redemption of Seigniorial Rents, 1935-44. Acted as Parliamentary Leader of the Liberal Opposition, 1936-39; Minister of Roads and Public Works, Nov. 8, 1939-March 4, 1944. Chairman of Bureau of Economic Reconstruction Nov. 8, 1939-March 4, 1944. Supreme Governor of L'Institut Democratique Canadien, 1943; President, Canadian Unity Alliance, 1945.

Senator Bouchard will discuss the basis of Canadian unity as affected by bilingualism, the progress towards unity achieved in recent years and the practical means of furthering good relationship between the two main lingual groups in Canada.

FIRST GENERAL MEETING

ROYAL ONTARIO MUSEUM

THURSDAY, NOVEMBER 6, 1947

8:15 P.M.

VICTOR L. STEFFEL, D.D.S.

Subject: "REMOVABLE PARTIAL DENTURES AND RELATED FACTORS"

Dr. Steffel graduated from Ohio State University, College of Dentistry, 1926, and has been a member of the Prosthetic faculty ever since graduation. At present he is Professor of Prosthetics and Chairman of the Partial Denture Department, Ohio State University.

His presentation will stress proper design and support for partial dentures with thorough coverage of the problem of equalizing tooth and ridge support. Kodachrome slides will be used throughout to illustrate the points covered.

Dr. Steffel will also present two limited attendance practical clinic sessions—9.30 a.m.-12 noon, and repeated, 2 p.m.-4.30 p.m. Attendance will be limited to the first twenty making application for each session.

Application and a registration fee of ten dollars, made payable to the Academy of Dentistry, should be forwarded to the Secretary, Edgar A. White, 1474 Bathurst Street.

ANNUAL WINTER CLINIC
THURSDAY
NOVEMBER 27, 1947
ROYAL YORK HOTEL

In order to prevent delay and confusion at the registration desk please send in your registration well in advance to Dr. E. C. McGowan, 786 Eglinton, E.

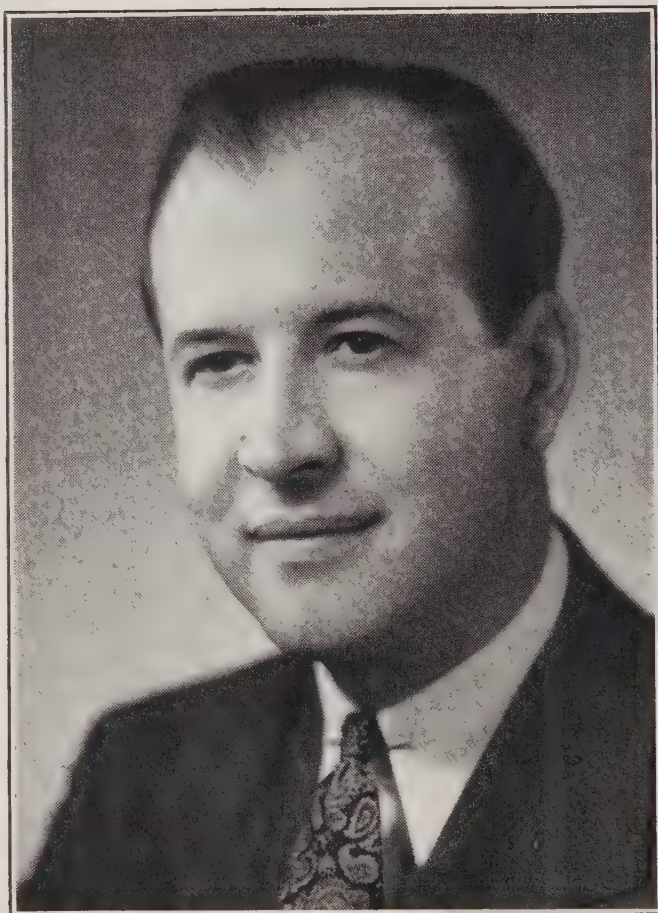

ANNUAL WINTER CLINIC

CLINICIANS

Dr. Stanley C. Brown, Ithica, Michigan.	"Factors in the Successful Practice of Children's Dentistry in a General Practice."
Dr. Homer E. Faust, Ann Arbor, Michigan.	"The Indirect Gold Inlay as an Individual Res- toration and Bridge Abutment."
Dr. W. L. Chalmers, Toronto.	"Helpful Hints in Oral Surgery for the General Practitioner."
Dr. F. L. Cole and Dr. R. L. Twible, Toronto.	"A Method of Building Anatomical Dentures on Either a Straight Line (Simple) or an Anatomical (Adaptable) Articulator."
Dr. J. J. Craig, Peterborough.	"The Responsibility of the General Practitioner to his Child Patients."
Dr. G. V. Morton, Toronto.	"Hints on Practice Management."
Dr. M. N. Rockman, Toronto.	"Simple Radiodontic Interpretation."
Dr. Charles Ruddell, London.	"Application and Management of the Rubber Dam."
Dr. T. N. Scott, Toronto.	"Partial Denture Prothesis."
Dr. J. M. Sheldon, Toronto.	"The Evaluation of Porcelain and Acrylic in Operative Procedures."
Dr. Douglas Tanner, Toronto.	"The Diagnosis of Malignant Diseases of the Mouth."
Dr. F. F. Tisdall, Toronto.	"Dietary Facts and Fallacies."
Dr. H. A. Swales, Toronto.	"Dental Public Health on Review."
Dr. C. H. M. Williams, Toronto.	"Occlusal Correction for the Interception and Early Correction of Malocclusion."

ANNUAL WINTER CLINIC

GROUP CLINICIAN

HOMER EDWARD FAUST, D.D.S.

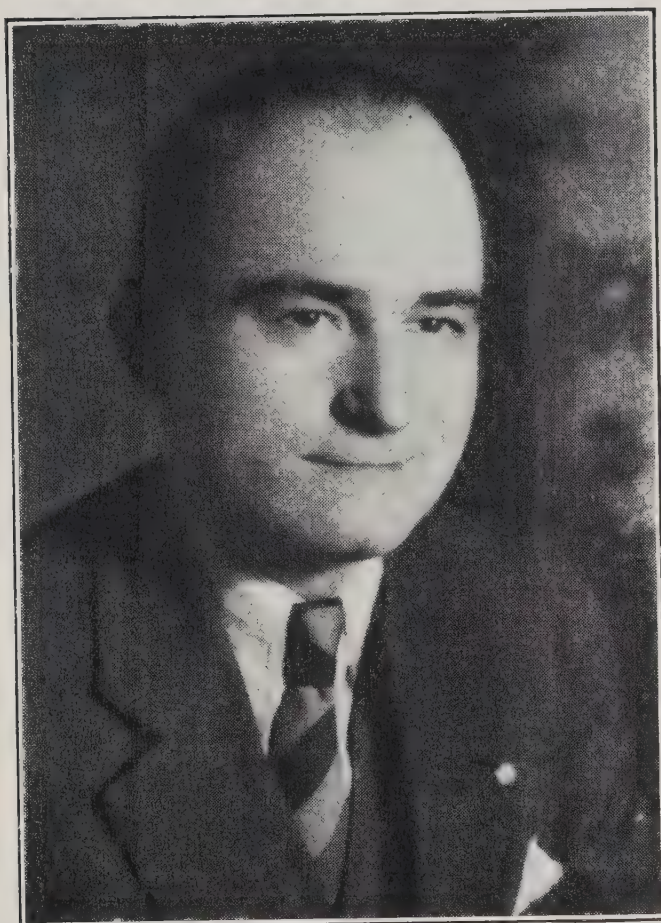

**Subject: "THE INDIRECT GOLD INLAY AS AN INDIVIDUAL RESTORATION
AND BRIDGE ABUTMENT"**

Dr. Faust, both of whose parents are Canadian born, is a graduate of the University of Michigan, School of Dentistry in June, 1933. Part-time teacher at the University of Michigan in Crown and Bridge Prosthesis and Ceramics since 1936, first as an instructor and, since 1941, as an Assistant Professor. Part-time practice of general dentistry.

In his presentation, Dr. Faust will cover cavity preparation, impression taking, model formation, waxing, casting and finishing. Models of technique and practical cases showing fixed bridge design and construction will be presented.

ANNUAL WINTER CLINIC

GROUP CLINICIAN

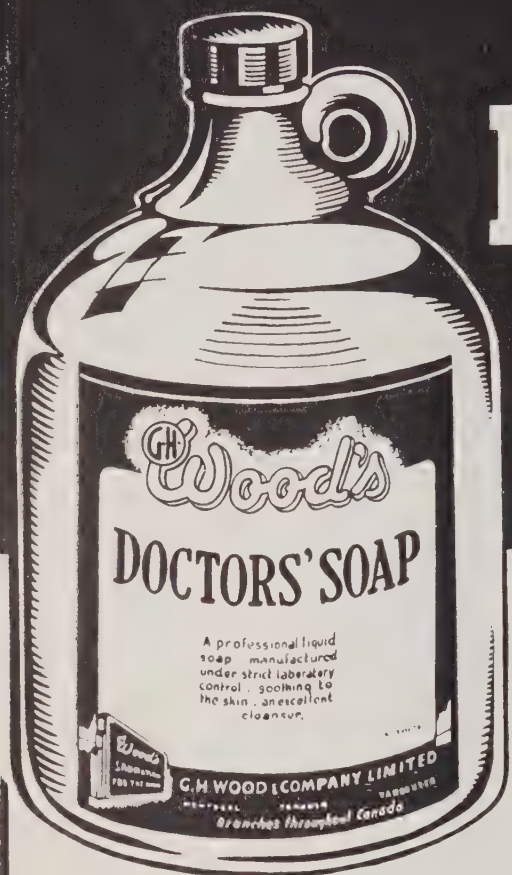

STANLEY C. BROWN, D.D.S.

**Subject: "FACTORS IN THE SUCCESSFUL DENTAL CARE OF
CHILDREN IN GENERAL PRACTICE."**

Dr. Brown graduated from the School of Dentistry, University of Michigan in 1920. Since graduation he has been keenly interested in dentistry for children, and has attended many post-graduate courses; he has also conducted refresher courses in dentistry for children.

Factors in child management, and the use and value of the rubber dam will be discussed.

Wood's DOCTORS' SOAP

Specifically designed to provide a highly efficient cleansing agent . . . you will like the emolient qualities of this super fatted doctors' soap . . . formulated in conjunction with leading specialists . . . mildly yet pleasingly perfumed.

The new streamlined No. 91 dispensers equipped with 18.8 stainless steel valves are guaranteed *leak-proof*. A beautiful piece of equipment.

ANNUAL WINTER CLINIC

LUNCHEON SPEAKER

PROFESSOR J. D. ROBINS, M.A., Ph.D.

Professor Robins was born in Windsor, Ontario, and educated at the University of Toronto (M.A.); University of Chicago (Ph.D).

Since 1914 has been on the staff of Victoria College, and has been the head of the department of English since 1938.

The author of "The Incomplete Anglers," and editor of "A Pocketful of Canada."

In 1945 he became the Librarian of Victoria College.

SECOND GENERAL MEETING

ROYAL ONTARIO MUSEUM

WEDNESDAY, JANUARY 14, 1948

8:15 P.M.

RALPH G. PETERSON, D.D.S.
Minneapolis, Minn.

Subject: "ACUTE INFECTIONS OF FACE AND JAW."

After graduating from the University of Minnesota in 1927, Dr. Peterson limited his practice to oral surgery and associated maxillo-facial surgery. He is a member of the American Society of Oral Surgeons, and a former Assistant Professor of Oral Surgery and Pathology, University of Minnesota. He has written widely on various subjects pertaining to Oral Surgery.

The presentation will be accompanied by lantern slides.

THIRD GENERAL MEETING

ROYAL ONTARIO MUSEUM

WEDNESDAY, FEBRUARY 18, 1948

8:15 P.M.

P. G. ANDERSON, D.D.S., F.A.C.D.

Subject: "PROCEDURE IN THE GENERAL PLAN OF MOUTH CARE."

Many operative procedures that once were cumbersome and only mildly satisfactory have been modified and improved to a degree where, with reasonable care, almost any purely operative condition can be treated effectively. Closer attention however should be paid to dental operative procedures in relation to other phases of dental care and the future health of the entire mouth. This presentation deals with mouth conditions as we find them and how, through operative means, we can do much to prolong function and usefulness in cases where the outlook is none too favourable. Dental operative methods as they are related to orthodontic, partial denture, and periodontal treatment, will be discussed and illustrated with slides.

The rationale of "ENZIFLUR" therapy

As an Aid in the Prevention of Dental Caries

It has been suggested¹ that fluorine may be adsorbed on the surfaces of the enamel through the medium of the saliva. Investigations reveal that the fluorine may then combine with enamel to form fluorapatite thus rendering the tooth less susceptible to caries attacks. Recent clinical studies² of 512 children showed a decrease of 77 per cent. in the incidence of dental caries in subjects receiving "Enziflur" — calcium fluoride with vitamins C and D.

Each "Enziflur" Lozenge supplies 2 mg. of calcium fluoride, 30 mg. of vitamin C and 400 Int. Units of vitamin D. Available in bottles of 30 and 100 lozenges.

1. Leicester, H. M.: J. Am. Dent. A. 33:1004 (Aug.) 1946.

2. Strean, L. P., and Beaudet, J. P.: New York State J. Med. 45:2183 (Oct. 15) 1945.

FOURTH GENERAL MEETING

ROYAL ONTARIO MUSEUM

THURSDAY, MARCH 11, 1948

8:15 P.M.

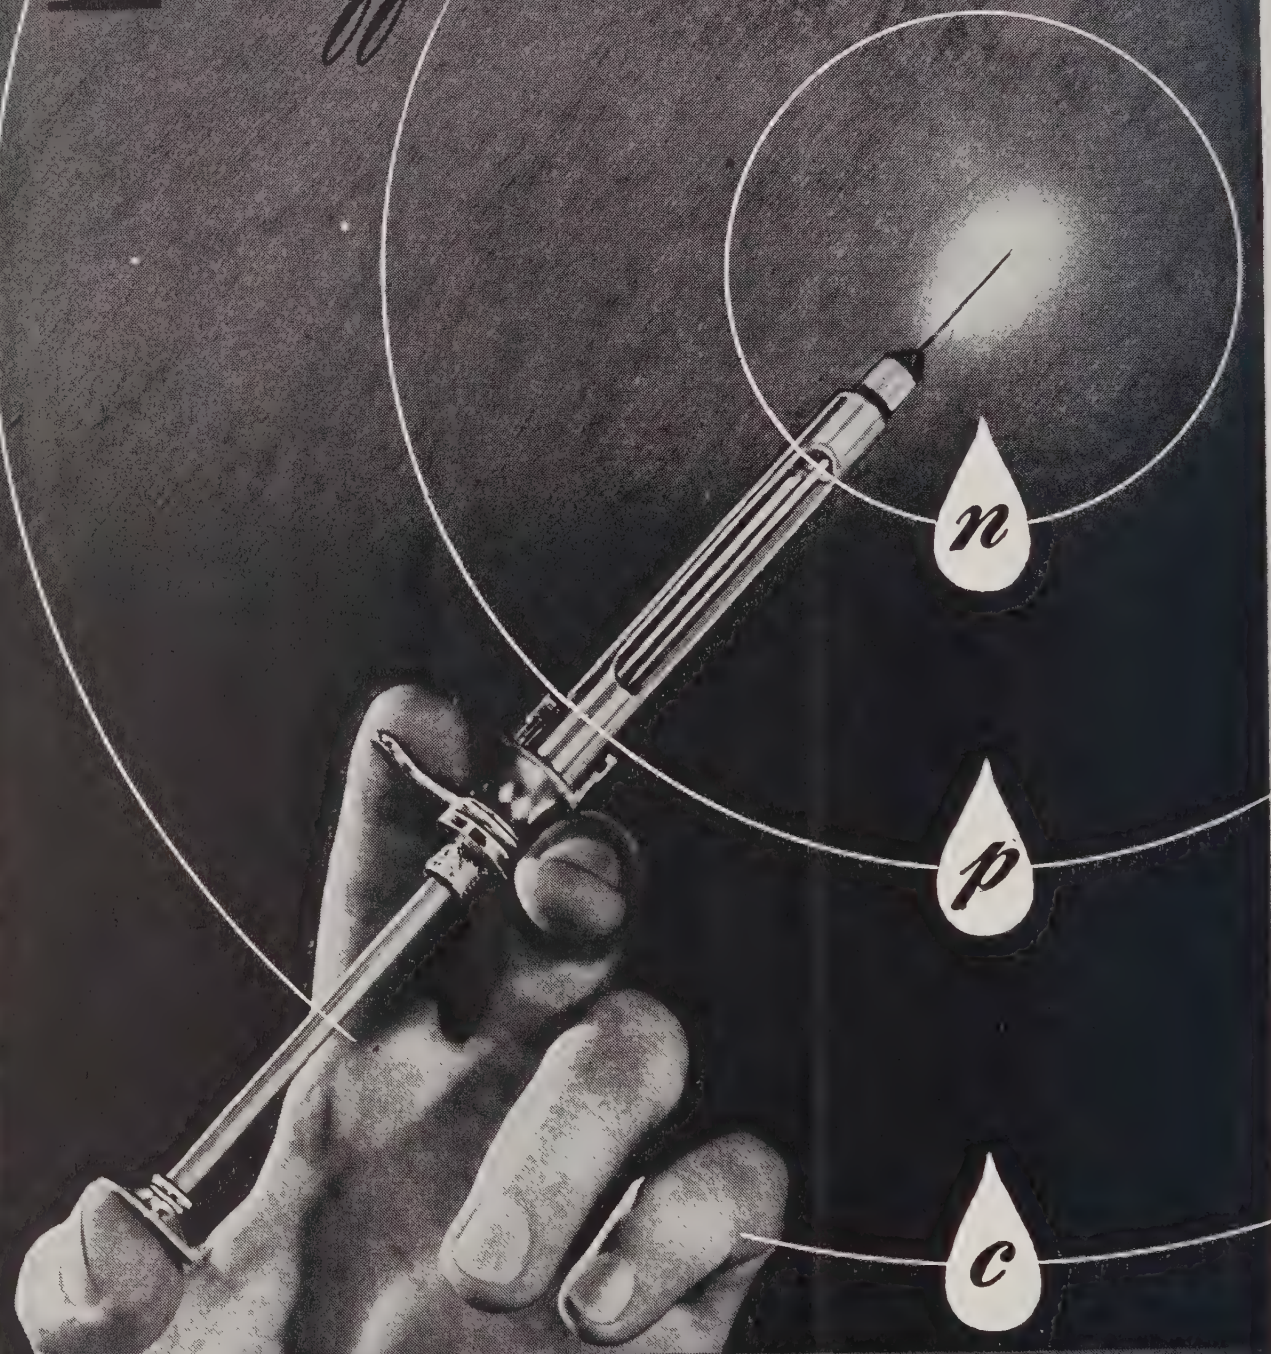

LE ROY JOHNSON, D.D.S.

Subject : "CHILDREN'S DENTISTRY WITHOUT TEARS."

The subject of dentistry for children will be discussed solely from the standpoint of the general practitioner. The psychology of management of the child patient will be dealt with and some practical techniques suggested. The rewards to the dentist for such service, both monetary and otherwise will also be discussed.

The difference is distinctive

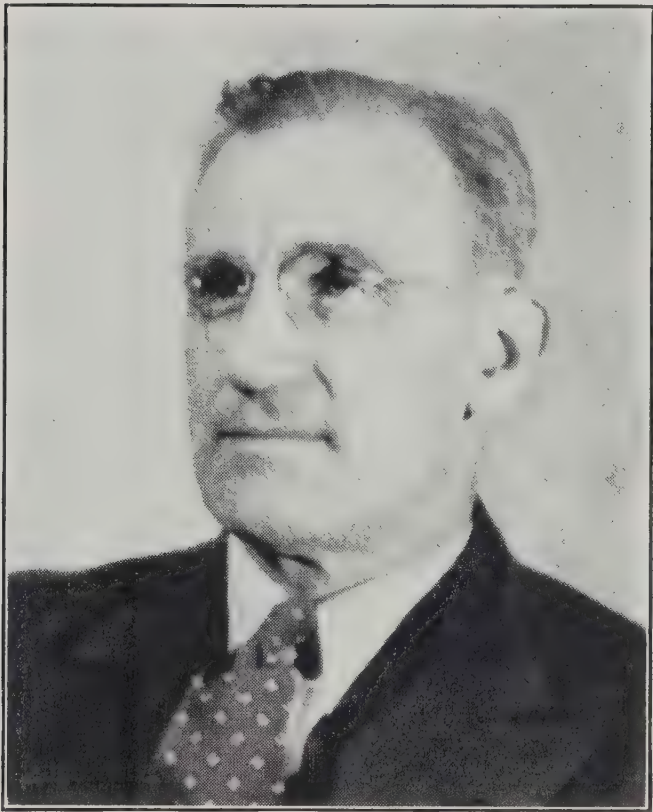

NOVOCAIN-PONTOCAINE-COBEFRIN
deeper anesthesia, longer lasting anesthesia
without added vasoconstrictor

Strain control ... safeguards against dimensional change – denture distortion!

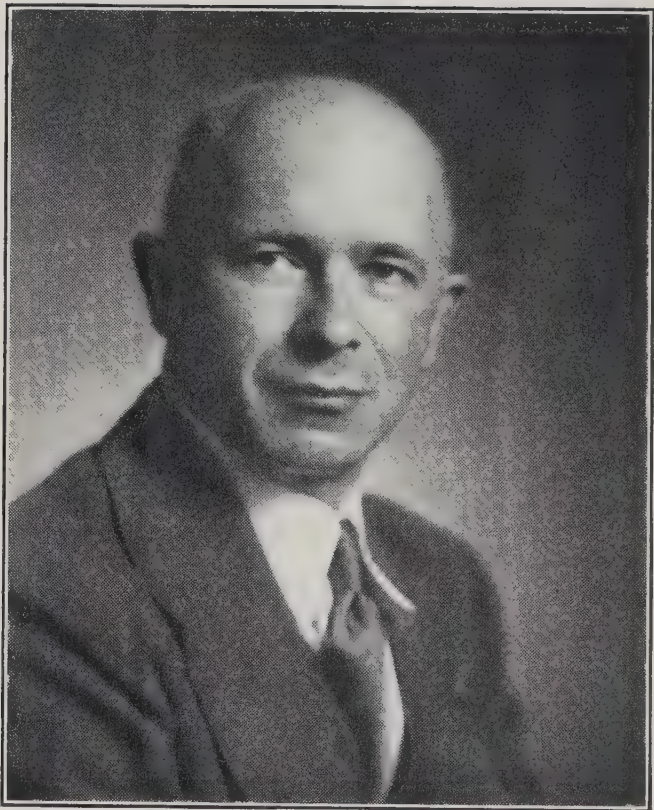

Internal strain
developed within a denture
seeks release constantly
in one direction or another.

To prevent distortion
and dimensional change,
a special method for Strain-Control
was therefore developed for Densene "33"—to assure
accurate initial fit . . . mouth service fit!

COSMOS DENTAL PRODUCTS, INC. • 115 WEST 45TH STREET, NEW YORK CITY

TORONTO CENTRAL DENTAL ASSOCIATION

DR. J. S. WILKINSON, President

The Central Dental Programme for the 1947-1948 season will be drawn up when definite information concerning resources is available. The large increase in the number of eligible members has made it very difficult to obtain suitable accommodation for the dinner meetings. However, the executive will endeavour to arrange an attractive programme and will notify all dentists in the Central area in advance of each meeting.

4 points of superiority

Metal Cap Anestubes

For the protection of Monocaine users, our cartridges are provided with a fluid-tight Metal Cap . . . the cap may be flamed before use to assure an unbroken chain of sterile precautions. The cap cannot be forced off during the injection, even when pressure is exerted. Only Metal Cap Anestubes provide these extra advantages.

Vacuum Packing

For further protection, Monocaine in Metal Cap Anestubes is vacuum packed. From the time the vacuum packed tins leave our laboratories until they are opened in the dentist's office, the freshness and full potency of the solution is maintained. Anesthesia is uniformly potent.

Monocaine

Since its introduction in 1937, Monocaine HCl has become the local anesthetic of choice amongst tens of thousands of physicians and dentists all over the world. Monocaine produces safe, uneventful anesthesia and may be used on all types of patients where local anesthesia is indicated.

Acceptance

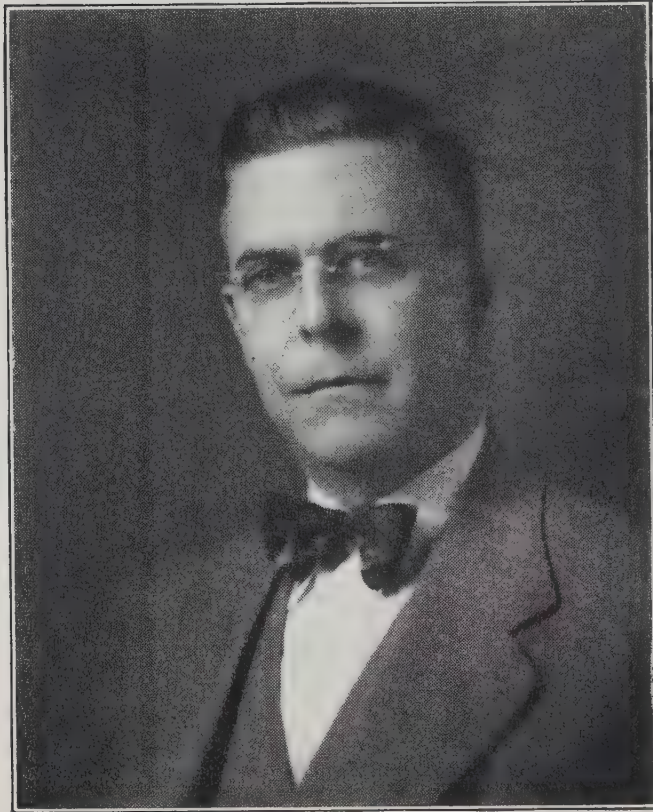

Monocaine Solutions — both 1% and 1½% — have been accepted by the Council on Dental Therapeutics of the *American Dental Association* and the Council on Pharmacy and Chemistry of the *American Medical Association*. (Monocaine HCl 1½% with Epinephrine 1:100,000 should be used only in those cases in which anesthesia is difficult to obtain.)

Monocaine is the registered trade mark of the Novocol Chemical Mfg. Co., Inc.

ONTARIO DENTAL ASSOCIATION

DR. R. P. LOWERY, President

The Academy of Dentistry, Toronto, once again comes forward with a programme worthy of the appreciation of every Dentist in the District. How a practicing dentist can refrain from participating in this endeavour, will be hard to understand.

Your programme booklet again reflects much thought and plenty of real work, and on behalf of the Board of Governors of the Ontario Dental Association, I wish you a very successful season.

PERC. LOWERY.

BLUE CROSS HOSPITAL PLAN

The approaching season will be the fourth year in which the Academy of Dentistry has sponsored the Blue Cross Hospitalization Plan for members of the Academy. Some 212 Fellows are subscribers to this hospitalization service, or nearly 800 dentists and dependents. The Plan has proved to be very satisfactory to all who have had to call upon its services.

Twice annually (November and May) new subscribers are enrolled. Hospitalization coverage commences on December 1st. All subscribers must be Fellows of the Academy of Dentistry to be enrolled under its sponsorship.

The rates are \$9.00 for single subscribers, or \$18.00 for dentist, wife and all children under 16 years. Children from 16 to 20 years of age may be enrolled, with the subscribing dentist, as dependent single subscribers.

WHAT PLAN FOR HOSPITAL CARE OFFERS YOU

When your own physician says "You must go to the hospital", as a subscriber to Plan for Hospital Care you will be entitled to the following benefits for yourself, your wife and each child enrolled, without limit as to cost in accordance with the terms of the subscriber's contract.

31 days of hospital care in the first contract year; 36 days the second year; 41 days the third year; 46 days the fourth year; 51 days the fifth year.

Semi-private accommodation.

Meals and dietary service.

General nursing service.

Basal metabolism tests.

Use of operating room as often as necessary.

Dressings and plaster cast materials.

Anaesthesia equipment and material.

Emergency hospital service following an accident.

Routine clinical pathology service.
Electrocardiographic films.

Maternity care: One half the hospital charges (up to 12 days) after one year.

Routine bio-chemistry service.

Laboratory services and tests as listed above are provided when necessary to other treatment in hospital, but not solely for diagnostic purposes.

SOME OUTSTANDING FEATURES OF THE PLAN

No physical examination, no health statement, no medical questionnaire.

Hospital services are provided for every type of disease, illness or injury.

Chronic or pre-existing conditions are covered.

No age limits for adults.

Private accommodation, when available, may be had by payment of the difference in hospital charges directly to the hospital.

For application blanks and further information call the Chairman of the Hospital Plan: Dr. Charles McLean, 1503 Sterling Tower, Waverley 2236.

TORONTO AFFILIATED ASSOCIATION ONTARIO DENTAL NURSES' AND ASSISTANTS' ASSOCIATION

The Executive and Members of the Toronto Affiliated Association extend a cordial welcome to all dental assistants and nurses to attend our monthly meetings which are held at the Royal York Hotel the first Monday of every month in Private Dining Room Number 7.

The year's programme has a definite aim—to be instructive as well as entertaining to all members. The membership committee also have an aim—the promotion of friendliness among the newer members and to see that all members are acquainted at every meeting.

We sincerely hope that all present and prospective members will join to support our effort to make 1947-1948 a most interesting season. The dates are listed below and a friendly welcome awaits you.

The Academy of Dentistry has been very kind and co-operative to our Association and on behalf of our members I express our appreciation and best wishes for a very successful year.

TOMYE TURNER, President.

REPORT OF THE SECRETARY 1946-47

I am pleased to report herein the activities of the Academy of Dentistry for the year 1946-47, which under the capable leadership of Dr. Colton Bliss were most successful.

The paid membership in the Academy for the year was 391, while in addition complimentary membership was extended to 203 ex-service men who had resumed practice in Toronto and district after service in the Canadian Dental Corps. There were 6 Honorary Life members and fourteen Honorary members. During this period of flux it was difficult to keep the mailing list exact at all times and the Secretary expresses regret and craves indulgence if any were overlooked. It would be of great assistance if the Fellows would report any change of address directly to the Secretary.

The Annual Dinner was held at the Royal York Hotel with Dr. Sidney Smith as guest speaker and at this function Dr. Gordon McLean and Dr. William Trelford were awarded Honorary Life Memberships in the Academy in recognition of the meritorious services which they had rendered to their profession.

As usual, four general meetings were held, each with an outstanding essayist. In addition Dr. Carl Miller gave limited attendance clinics on amalgam to capacity groups. All meetings held during the year were well attended.

The Winter Clinic, under the energetic chairmanship of Dr. Harold Shepherd, was again an outstanding success, the attendance reaching the record figure of 735. Due to the sharp increase in housing and general carrying costs it was found necessary to depart from established custom and collect a registration fee for the Clinic. However, this fee, which was introduced with reluctance, was accepted without complaint by the members.

All dentists of Toronto and district who had served with the C.D.C. were welcomed home at dinners arranged jointly by the Rehabilitation Committee of the Academy and the Dental Trades Association. These evenings of fellowship were genuinely appreciated by our returning confreres.

The function of the War Services Committee ended shortly after the cessation of hostilities, and this Committee has now been dissolved. The residual funds in the treasury at the time of dissolution have, with the approval of the Department of War Services at Ottawa, been transferred to the University of Toronto where they will be used to assist ex-service students of the Canadian armed forces (Active) who are graduates in Dentistry and wish to pursue advanced studies. The work of this Committee will be long and gratefully remembered and the success it achieved was due largely to the inspiring and energetic leadership of the chairman, Dr. Howard Graham.

The Rehabilitation Committee is continuing its activities. The premises at 14 Spadina Road are fully occupied and the Committee has been able to arrange continued tenancy at least until June, 1948. Much credit is due this Committee, all of whom gave unsparingly of their time and effort. Particular appreciation is due to the Secretary, Mr. Charles McKenna.

The Blue Cross Plan for Hospital Care was again under the direction of Dr. Charles McLean. The plan is finding constantly increasing acceptance by our members and a total of approximately 800 members and their dependents are now protected under the plan.

The annual prize of one hundred dollars donated by the Academy to the Faculty of Dentistry for the student showing the greatest proficiency in Dentistry for Children in the final year was won by C. E. Aho.

The evacuation of Osler Hall presented the Academy with a difficult housing problem. Every effort was made to meet it, but the situation for the current year was not entirely satisfactory. The matter is under review and a Committee has been set up to work in conjunction with the Academy of Medicine in investigating the possibility of building a permanent joint home for the two societies.

Respectfully submitted,

J. H. JOHNSON, Secretary.

Modern

has come of age... no longer sparse and severe, but with its own enduring grace... full-blown, beautiful and definitely livable! TREASURER'S REPORT
ACADEMY OF DENTISTRY
REVENUE AND EXPENDITURE ACCOUNT
FOR THE YEAR ENDED 30TH APRIL, 1947

Academy of Dentistry,
Toronto, Ontario.
Gentlemen,

We have prepared the attached Balance Sheet of the Academy of Dentistry as at 30th April 1947, together with a Revenue and Expenditure Account. Subject to the following report, we hereby certify that in our opinion the attached balance sheet is properly drawn up so as to exhibit a true and correct view of the state of the Academy's affairs at that date, according to the explanations and information given us, and is as shown by the books.

We report upon the various balance sheet items in their order as follows:—

Assets

Cash in Bank—\$1,369.72

Your bankers have confirmed the bank balance to us by certificate.

Dominion of Canada Bonds—\$5,516.18

Details are shown on the face of the balance sheet. We have verified the interest revenue due from these bonds.

We have examined the bonds comprising the above total.

Liabilities

Accounts Payable—Nil

Your Treasurer, Dr. E. A. White, has certified that all known liabilities to 30th April 1947 have been paid, and that there were at that date no guarantees or contingent liabilities outstanding.

Profit and Loss

Details are shown on Schedule A.

Academy of Dentistry

A comparison of the total revenues and expenses for the current year with the preceding one is as follows:

	30th April 1946	30th April 1947
Total Revenue	\$3,926.67	\$4,711.89
Less: Total Expenses	3,878.76	4,289.88
Surplus for the Year	\$ 47.91	\$ 422.01

As we were unable to make a complete verification of all the sources of revenue, we are accordingly able to certify to the correctness of the Revenue Account only to the extent that it is in agreement with the books given us.

We are,
Yours faithfully
HILL, TESKEY CO.,
Chartered Accountants.

What's the Cow Population of Canada ?

There are nearly 4,000,000 dairy cows on Canadian farms.

This amazing total is actually one cow for every three people and it indicates how vast is the production of Canadian milk and cream.

When you consider that there are 4,500 plants where milk and cream are handled or processed you begin to understand how important to Canada is her dairy industry.

This industry takes the output from 500,000 dairy farms and produces hundreds of by-products besides butter,

cheese, ice cream and milk concentrates. It does a yearly business of over \$400,000,000 and employs, directly or indirectly, over 17% of Canada's population.

Dairy products and concentrates are playing a vital part in the relief and rehabilitation of a hungry Europe.

We, of the Borden Company, are doing everything we can to help. We are continuing to carry out this responsibility and also to supply our Canadian customers, thanks to the loyal assistance and co-operation of 3,137 Borden employees.

CAROID* DENTAL POWDER

has been clinically tested by the Dental Faculty of a leading university. Results of three years of clinical and laboratory testing are summarized below:

1 cleans and polishes teeth safely
Caroid Dental Powder equalled all requirements for a safe non-abrasive dentifrice.

2 liquefies oral mucin
Helps prevent formation of bacteria-harboring plaques on the teeth by dissolving viscous deposits.

3 dissolves organic debris
Acts rapidly to dissolve food particles and remove broken-down epithelial tissue in the oral cavity. This action also assists the healing process in the surgical treatment of pyorrhea.

4 retards formation of calculus deposits
Calculus is softened by action of the enzyme on the organic matter in the lime salts which form the deposit.

5 harmless to vulcanite and acrylic dentures
Immersion tests at 37°C. showed no effect on consistency, color or odor.

6 removes stain from metal
Remarkable cleansing and polishing action on gold or other metal used in crowns, bridges, partial dentures, removable or fixed appliances.

Carter, Cummings & Co. Limited, Windsor, Ontario

FOR THE SUSTAINED CONCENTRATION OF PENICILLIN
SO ESSENTIAL IN VINCENT'S INFECTION

Penicillin Chewing Troches

SQUIBB*

"The pattern of response to penicillin administration in acute Vincent's infection of mouth or throat has generally been described as dramatic."¹

The problem of adequate and sustained concentration of penicillin in the mouth is vastly simplified with Penicillin Chewing Troches Squibb. Each troche contains 20,000 units of penicillin calcium in a flavored paraffin base. This high potency helps to secure rapid and effective control of the infection.

Slow chewing of Penicillin Chewing Troches Squibb provides a high concentration of penicillin in the saliva during the first hour and significant levels *even at*

the end of four hours. Infected tissues that might not be reached by more static methods of local administration can be reached with chewing troches.

Two or three troches daily have proved sufficient in many cases of Vincent's infection, but where conditions require a continuous high concentration of penicillin, the troche may be renewed every hour or two.

PLEASE SPECIFY SQUIBB WHEN WRITING
YOUR PRESCRIPTION. Box of 6 Troches.

**Accepted by the Council on Dental Therapeutics of the American Dental Association.*

PLASTICOLL

Is Back Again!

Remember Plasticoll's—

THREE PROVEN POINTS OF PERFORMANCE

1. No fibres . . . yet tougher, stronger, smoother. Fibers are not needed in Plasticoll to give it strength and therefore do not prevent the free flow of the material into hairline interproximal spaces where accurate reproduction is desired.

2. Lower mouth temperature . . . means . . . greater patient comfort. Plasticoll's low gel-point (only 96.8 degrees F.) allows for greater cooling before placing in the mouth and the material is inserted at a lower and more comfortable temperature.

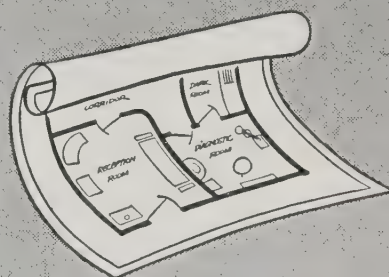

3. More elastic . . . thus . . . more accurate. Accuracy, the most desirable quality of a hydro-colloidal impression material, finds its greatest perfection in Plasticoll through its proven elasticity.

PLASTICOLL'S SMOOTHNESS, STRENGTH AND
ACCURACY HAS WON FOR IT A HIGH REGARD IN THE
EYES OF THE DENTAL PROFESSION.

Here's why you get

BRIGHT

CONTRASTY

Radiographs everytime with a
CDX

Complicated controls — often the cause for error in dental radiography—are not found on the G-E *CDX*. This makes the *CDX* so easy to operate that you make bright, contrasty radiographs, rich in diagnostic detail consistently and with a minimum of effort.

If you are contemplating buying your first dental x-ray unit or replacing your old, write for your copy of the *CDX* booklet today. You'll readily see why it is so amazingly easy to consistently make satisfactory radiographs with a *CDX*.

FOR YOUR PROTECTION . . .

The Brand Names you trust were not built for boom-times or off-times—high prices or low.

They've signed their names to their products and they can't afford to let you down today—since they call on your memory tomorrow.

That's why Jack Armstrong's Clothes Shop sells the country's leading brands.

Among the leaders handled by Jack Armstrong are:

GEO. ROBERTS, Selkirk, Scotland.

SAMBROOK-WITTING, England.

THOMAS HEATH, ARROW AND FORSYTHE, WEMBLY, GLOBE, E. & S. CURRIE, Ties and Accessories, Miller Casual Shirts, and Karen Bulow Neckwear.

▼

The logo features a large, stylized, handwritten signature of "Jack Armstrong" in dark ink. A diagonal line is drawn across the signature. Below the signature, the word "CLOTHES" is printed in a bold, sans-serif, all-caps font.

A New Field

A New

OPPORTUNITY

Now accustomed to dental care received in the armed forces, millions of veterans want continued treatment and service from home-town dentists. Many need two and three tooth partial restorations that are strong and tough and obtainable at moderate cost. Only a plastic partial denture meets the cost requirement. Only LUXENE 44 partials have the strength and toughness necessary for satisfactory, virtually breakage-free, mouth service. Thus is opened to every dentist a new field — a new opportunity; to furnish partial dentures to thousands who may now be doing without. Take advantage of LUXENE 44 partials to build your practice with increasing numbers of new patients.

| 1 Powder No. 25 Light Yellow-Gray | 2 Bottles of Liquid |
| 1 Large trial portion Zinc Silicate Powder No. 20 | |
| 1 Large trial portion Zinc Silicate Liquid | |
| (Color Matching Guide not included) | |

VALUE: Less Trials and Dispensing Tray \$31.10 Price **\$26.00**

Filling Porcelain Improved Complies with A.D.A. Specifications

To acquaint you with the merits of Zinc Silicate, a trial portion is included in this offer. Stronger and more durable in mouth fluids than any similar filling material, it is recommended for posteriors when esthetic results are the prime objective. Mixes smooth, allows ample working time. Can be finished in 15 to 20 minutes.

Scientifically Prepared Foods
You Can Recommend for
SOFT DIETS

Heinz Strained Foods and Junior Foods, designed chiefly for infants, can be recommended with confidence to dental patients following extractions.

In cases where teeth have been removed the soft diet that requires little or no chewing is called in hospitals an "edentulous diet". For this purpose nothing could be more convenient or easier for patients to prepare than Heinz Strained and Junior Foods. Also, since there are so many varieties available, there need be no monotony in such a diet.

These foods are smooth, nourishing and delicious. Most adults will prefer to add seasoning to suit individual tastes.
